

**5-5 Intercepts Method**Graph each line **using the intercepts method**. Show your work!

1.  $4x - 2y = -8$

2.  $-2x + 4y = 8$

3.  $3x - 4y = -12$

4.  $3x - 2y = -6$

5. Graph a line that has x-intercept  $(-2, 0)$  and doesn't have a y-intercept.
